

# The Yellow House CD

The Yellow House CD tells the story of how COIN's co-executive director George Marshall and his wife Annie turned their 1930s ex-council house into an environmental dream home.

The CD includes a full photo gallery, four video tours of the main features of the house, two videos about climate change, seven new articles on eco-renovation and low carbon lifestyles.

The CD works on any PC or MAC which is less than five years old. To watch the videos you will need a web browser with a modern media player, such as Real Player or Quicktime, and a computer with a sound card.

The CD costs only £12.50, including all postage and packing. All profits from CD sales go to help fund COIN.

To order the CD please send your address with a cheque made payable to Climate Outreach and Information Network, to:
